PRODUCT
RANGE**

AW PARKING STOPS (patent pending)

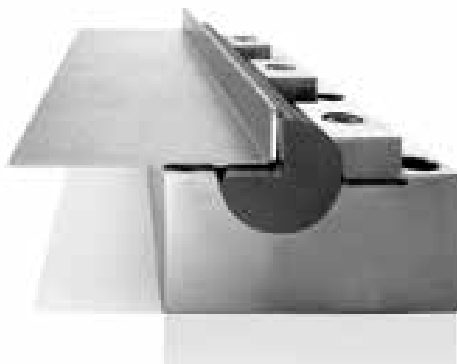

- Designed and built for storage and transport of press tools
- Model load range from 2500 daN to 18000 daN
- Possibility to stack AW Parking stops to allow ease of maintenance

AW ROLL BENDERS

- AW Roll benders hold consistent part tolerances, over bend to counter spring back is an advantage.
- All parts fully hardened and surface treated to reduce friction
- Hold angle tolerance no re-strikes
- Overbend
- Decorative steel forming without witness marks
- Designed for consistent tolerances especially on aluminium and high strength steels

There are six models that vary from different mounting systems. Each model may vary depending on the type of material, thickness, geometry and bend radius, length of the bend. The ideal combination is selected by our technical department based on the analysis of these parameters

AW SLIDING ELEMENTS:

- Standards: DIN, VDI, AFNOR, ANAS, AUDI, FORD, VW
- Bushes
- Wear Plates
- Gibbs
- V-Drivers
- All products are manufactured from high quality materials to give reliability and quality
- CAD Data available online in 2D and 3D to suit most CAD Suites
