

Manufacturing plays an important role in the Midlands economy and is integral to our regions future growth story. Manufacturing is a core focus for us, we have committed to support manufacturing in the UK and drive growth by lending an additional £1bn each year to drive growth in the manufacturing sector until 2017.

In addition to this we have launched a £1 million a year sponsorship of the Lloyds Advanced Manufacturing Training Centre right here in the heart of the Midlands at the Manufacturing Technology Centre in Coventry which is due to open in 2015. This centre will help to address the sector's skills gap in the UK and develop more than 1,000 engineering apprentices and trainees during the initial Lloyds Banking Group Partnership.

We have invested in a team of relationship managers who are trained and accredited in manufacturing awareness by the Warwick Manufacturing Group, ensuring they have sector-specific knowledge and a greater understanding of the unique challenges facing manufacturers allowing them to better support manufacturing businesses.
