MADE IN THE
MIDLANDS
AWARDS 2014

WINNER 2014

Class 8 Cleanroom services

Our Medical Division

- Design
- Tool manufacture
- Injection moulding
- Medical Device manufacture
- Medical Device Assembly
- Medical Device Packaging

Our new 'award winning' Class 8 clean room has been purpose built with the present and future expansion at the forefront of our minds. Helping us achieve a Manufacturing Achievement award in October 2014

We can provide our customers with a complete service of component design, mould tool manufacture, injection moulding, cleanroom inspection and packaging. In addition to this our expertise in post operative assembly means we can also offer assembly and packaging of medical devices.

Giving our customers confidence that each device has been manufactured, assembled and packaged under one roof with all the traceability and cost effectiveness that this provides.

Moulding partnerships

We invest time with our customers to mould our relationship into strategic Partnerships. To benefit both parties, by understanding each others businesses and requirements.

Andel Plastics has always prided ourselves on a flexible approach to manufacture, we welcome large production as well as small batch runs. We work with customers to develop new approaches and working practises, engineering solutions in all aspects of the manufacturing process to the benefit of the relationship and product itself.

Our customers have grown and developed with us over the last 40 years.

This philosophy continues within our Cleanroom, offering packaging and manufacturing services for individual surgeons and vets, up to large batch supply where the end user is the NHS.

Please contact us to discuss any Cleanroom requirements and let us work with you to provide the best service
